TANK GRIPS

EVO
The Evo features pronounced hemispherical traction domes. Ideal for riders who want that added level of confidence by being able to feel the grip through their leathers. Available in black and clear.

PRO
The Pro series tank grip is a polyurethane grip that features a low profile circular embossed pattern with a sleek and dynamic profile that allows greater rider movement on the bike. Available in black or clear.

SILICONE
The Silicone series tank grip is our most ergonomic grip, featuring a textured surface for ease of rider movement and a cushion feel from the unique properties of silicone, making this grip ideal for grand touring and commuting. Available in charcoal.

PPF
Our Paint Protection Film Tank Protector Kits are designed to protect the tank from clothing rubbing against the paintwork. Aimed at riders that don't require grip, but still want to protect their tank.

WRAP AROUND TANK GRIPS

Our Wrap Around Motorcycle Tank Knee Grips/Pads are manufactured from silicone and polyurethane. Available in Silicone and Pro material with a bespoke Centre Tank Pad included, they offer superb coverage, grip and protection.

The edges are chamfered to give a clean, premium look and prevent the Grip from lifting under hard cornering and braking.

The Wrap Around is split into 2 pieces for ease of fitting at home, and includes everything you need with wipes, badges and instructions.

They are ergonomically designed to fit the contours of the bike, giving maximum protection and comfort to both bike and rider.

SCUFF GUARDS

Introducing our Eazi-Grip™ Motorcycle Scuff Guard Kit Range.

The Silicone material provides a protective barrier between your swingarm/frame and boots to prevent scuffs and marks, especially while cornering.

Each Scuff Guard Kit is designed for the specific model of motorcycle, and is cut in-house to provide the best fit and quality. They are easy to apply with a durable self adhesive backing.

We update the Motorcycle Scuff Guard Kit range regularly. If you can't find your bike, let us know and we will look into adding it to our inventory.

Each Scuff Guard Kit comes complete with a step-by-step guide, your Scuff Guard pieces, logo badges and 1 Eazi-Grip cleansing wipe.

PAINT PROTECTION KITS

For race and track bikes; stone chips, abrasions, stress fractures and scratches can quickly damage fairings, forks and bodywork. For road bikes, the harmful effects of road salt, tar and airborne particles can dramatically reduce the resale value of your bike.

Eazi-Grip™ Motorcycle Paint Protection Film (PPF) is a non-yellowing, ultra-thin, ultra-tough, polyurethane protection film, designed to protect your motorbike and virtually eliminate damage. The unique properties of our PPF enable it to disperse the impact energy of gravel and small stones, bouncing them off and leaving your bodywork untouched beneath.

Eazi-Grip™ Motorcycle Paint Protection Kits are easy to fit, with sectional pieces, that in conjunction with our advanced fitting solution, simply float into place. Eazi-Grip™ Kits are extremely conformable around even tight radii and compound curves, making them easy to fit at home. Standard PPF kits cover the tip of the front mudguard, front fork shields, nose cone, leading edges of the fairings and tail unit. For customers requiring more than just the 'standard' coverage, for example panniers, top boxes, wing mirrors, headlights or any other requirements, we have an in-house design team that can produce bespoke patterns.

SILICONE HOSE KITS

We produce our Silicone Hose Kits exclusively for road and race bikes. Our specialist knowledge has been gained by supporting leading race teams in paddocks worldwide from road racing, through to Moto GP, where the Eazi-Grip™ brand is trusted and respected as one of the foremost suppliers of high quality performance products.

Our motorbike Silicone Hose Kits feature an easy to maintain heat resistant surface that also offers fantastic abrasion resistance and remains pliable during the life of the product.

Manufactured from only the highest quality silicone, our kits are designed to operate at temperatures from -50°C up to +180°C and at operating pressures of 2.5 – 15 bar meaning running temperatures can be reduced by up to 5°C.

Our high performance Norma-Clamp Torro Kits are an essential upgrade for replacing the factory fitted clamps. Made from marine grade W4 stainless steel with over 240 hours of corrosion resistance testing. Short smooth housing for best sealing performance. Bevelled safety edges prevent damage to the hose. Improved asymmetric housing – even distribution of forces 4 and safe assembly. Asymmetric extension – prevents the housing from tilting over when the clamp is tightened. Short housing saddle – even contact pressure – improved efficiency.

EAZI-GRIP SUPPORTED OMG RACING
KYLE RYDE - BRITISH SUPERBIKES

DASHBOARD PROTECTORS

Manufactured with our ultra thin, tough polyurethane protection film that we use for our Paint Protection Kits, our dashboard protectors prevent scratches to your screen. Supplied with one of our squeegees, solution, a cleansing wipe and a step-by-step guide, they are incredibly easy to install.

As with our Paint Protection Kits, each dashboard protector has been scanned, a Computer Aided Design generated and cut by our fully trained staff. No template libraires have been used, this assures the best quality. Every protector is bespoke to each bike model.

Eazi-Grip Dashboard Protectors are the perfect motorcycle accessory. Just peel, apply and ride.

HEAT SHIELD

Our heat shield features a composite construction of aluminium foil, silicone adhesive, glass cloth and flame resistant polyurethane, optimising barrier performance up to 550°C with minimal weight and material thickness. Presented in a self-adhesive format making it simple to install.

It has a higher than average 20mu aluminium foil face making it extremely durable and resilient even after repeated manipulation during fabrication. The adhesive used to laminate the aluminium foil to the glass cloth is a special high temperature silicone adhesive, greatly reducing the chances of the foil cracking or delaminating from the glass cloth. In addition, the base glass cloth fabric is impregnated with a black flame resistant pu coating to prevent fraying during CNC machine slitting and fabrication, ensuring a clean cut and professional finish.

Our radiant heat shield offers a flexible, easy to apply material to help reflect heat away from electrical components. It can also be used on the inside of fairings, body panels etc. to protect paint finishes from extreme heat, plus the bottom of fuel tanks, inside of sumps, bottom of air boxes and to prevent heat transfer to swing arms on close fitting exhausts.

****This product must not be adhered to hot surfaces e.g. exhausts as the adhesive would fail or ignite. It is only designed for radiant heat deflection.****
